FAIR SHARED CITIES: GENDER ORIENTED RESILIENT AND SAFE PUBLIC SPACES

The event aims to gather speakers and panelists in order to deepen the issue of the resilient and safe cities for women and men, with the viewpoint of the creation, planning and design of fair and shared cities in the perspective of gender issues. Bringing together a team of leading professors, the event offers a variety of insights into ongoing gender mainstreaming policies in the world with a focus on urban/spatial planning in Europe and Latin America, referring particularly on the public spaces issues. The final output will be the creation of a comprehensive overview of this particular, multidisciplinary issue. The event has two key objectives: to deepen the issue of the creation of fair shared cities with the perspective of resilient and safe cities; to provide new insights for urban planning in order to create, design and plan cities which will be fair for all, resilient and safe, by providing both methodological and practical information.
